About Me

I am a resolute, inquisitive, and growth-oriented individual. I approach every challenge with seriousness, enthusiasm, and the understanding that there is always something to learn. I am never content with merely meeting the minimum standards; I strive for excellence and continuously seek to enhance my skills, both professionally and personally. My approach is practical and modest: when I encounter a gap in my knowledge, I take the initiative to learn. I value professionalism, as well as the significance of fostering a positive, collaborative enjoyable work environment. My objective is to contribute meaningful value and to grow through the pursuit of excellence.

Gianluca Camarca

Gameplay Programmer / Technical Game Designer

Professional Background
